Summaries

and provide a small amount for equipment, technology, infrastructure, and other on-going costs including unfunded mandates and compliance.

St. Louis Equity Adjustment: State Request $1.9 million
According to a 2002 Coordinating Board for Higher Education study that evaluated full-time equivalent (FTE) funding relative to the mean and median of the appropriate classification peer group, the University of Missouri-St. Louis was identified as having a significant funding gap of $10.8 million in state appropriations. All but $2.2 million of the gap has been funded by special state appropriations and reallocations from UM System. The $1.9 million that we are requesting from the state, when added to the reallocation provided by the UM System, would reach the $10.8 million target.
