We changed our practice based on the derm ECHOs and started having men over 50 take off their shirts for their annual exams.
A couple of weeks ago found an ugly duckling on the back of a 61 year old. This week I excised it and the path came back today
Lentiginous junctional melanocytic proliferation with severe cytologic atypia and focal pagetoid spread. Atypical melanocytes abut one lateral edge of the specimen.
COMMENT:
The lesion is bordering on early in situ malignant melanoma. Complete excision of the lesion is recommended to ensure that it has been completely excised. I just thought I'd say thanks!
